PROFILE

Full-stack and mobile developer building digital products for African and international markets. Specialized in React Native, Expo, Next.js, TypeScript, Supabase, app store delivery, and payment-ready product architecture. Three years of shipped work: published mobile apps on App Store and Google Play, commercial boilerplates, and SaaS platforms built around African market constraints.

SELECTED PROOF

5 Published Apps — App Store + Google Play — Pro Rently, QuickBill, Chadito (4.9★, 500+ installs), al-Shaykh Ahmad al-Nur (4.8★), Kaminuza Hub.

AfriStack — Commercial boilerplate for African startups with MTN MoMo, Airtel Money, Supabase. Sold on Gumroad at \$19–\$69.

Pro Rently — Multilingual rental app — realtime chat, 4-language audio translation, Google Maps, RLS, MTN MoMo/Airtel Money.

QuickBill — Offline-first invoice app with PDF export, Gemini AI receipt scanning, zero cloud dependency.

CORE SKILLS

Mobile	React Native · Expo · Expo Router · EAS · TypeScript
Web	Next.js · Tailwind CSS · TypeScript
Backend	Supabase · PostgreSQL · SQLite · RLS policies
Payments & APIs	MTN MoMo · Airtel Money · Stripe · Google Maps
Tools & Cloud	GitHub Actions · Vercel · Railway · AWS Bedrock · Cursor · Claude Code

PROJECTS

Pro Rently

Mobile · React Native, Expo, Supabase, TypeScript, Google Maps, MTN MoMo

Role: Product builder · Mobile developer · Supabase architect

Impact: Published on App Store (v6.1.0, April 2025) and Google Play. Flagship mobile architecture case study. Multilingual rental platform for Kigali with realtime messaging, Row Level Security, and local payment flows.

QuickBill

Mobile · React Native, Expo, SQLite, Gemini AI, TypeScript

Role: Mobile developer · Product designer

Impact: Offline-first invoice and quote app for low-connectivity workflows. AI receipt scanning via Gemini, PDF export. Published on both stores (May 2025).

AfriStack

Boilerplate · Next.js, React Native, Supabase, MTN MoMo, Airtel Money

Role: Founder · Full-stack developer · Payment integration lead

Impact: Commercial Gumroad product (\$19–\$69). Starter kit for African startup MVPs with wired payment flows, webhook handlers, admin dashboard, multi-country support.

Griot

Platform · Next.js, Supabase, Claude API, TypeScript

Role: Full-stack developer · AI workflow designer

Impact: AI-assisted portfolio platform for African developers — GitHub import, AI-generated bio, public profile pages.

ETS Mistaguide

Platform · Next.js, Supabase, Stripe

Role: Full-stack developer

Impact: Import-export operations platform for a Chadian trading company. 500+ products, 80+ partners, 10+ years of business digitized.

EDUCATION & CERTIFICATIONS

Software Engineering	ULK Kigali	2022 – 2025
CS50 Python	Harvard / edX	2024

LANGUAGES

French — Native

English — Professional

Kinyarwanda — Learning

AVAILABILITY

Open for **React Native apps**, **SaaS MVPs**, **Supabase architecture**, **technical audits**, and African-market product builds. Response within 24h. Remote — Africa & International.
